

Eva's collection is one of our first and more known production lines. This collection has been developed following a linear but soft style, that reminds well-known Scandinavian design style.

The Eva Family's collection is composed of a series of lamps of different sizes, where the client can choose the combination of colors and fabrics that suit the project to its fullest. Moreover, the lampshade is handcrafted because the construction process requires great attention and a certain level of expertise, as a fact, the folded part is realized using a complex folding process, that isn't doable in any other way.
